

# WeAct – assisting to put more trees on the ground

Established in 2009, WeAct is an Australian financially regulated project developer (AFSL No. 425488) focusing on forestry methods. We manage a diverse portfolio of carbon offset projects to service our clients' needs. Our key markets include Australia, South Korea, Europe, India, Madagascar, Fiji, South Africa and Colombia. We have a strong presence in the voluntary market, dealing in the full range of offsets accredited under the Australian National Carbon Offset Standard, including offsets from the Gold Standard and VERRA.

We work very closely with the Plantation sector in Australia and operate a "Plantation Forestry Aggregation Model" to assist Plantation Growers to access carbon finance

Our expertise lies in our deep knowledge of international carbon markets and our global reach which assists us in getting the landowners the best possible pricing for their carbon sequestered. Over the years we have developed robust market infrastructure to efficiently facilitate carbon transactions.

***Our key partners / clients include:***

***World Bank, OnefortyOne Plantations, AKD Softwood, National Australia Bank, Samsung Electronics, Puma Energy, Vitol and others***
