Forico Pty Limited (Forico) is a Tasmanian forest management entity established in 2014 to manage private forest assets including 175,000ha of land, 100,000ha of plantation, a containerised forestry nursery, a technology laboratory, and processing and export operations for North West and North East Tasmania. Forico employs experienced professional staff strategically located within the core assets under management. Forico aims to provide private landowners with direct access to the entire forestry supply chain, all within an environment certified to the Australian Forestry Standard and Forest Stewardship Council.

Key services available to private landowners include;

- Standing timber purchase - All planning, roading, harvest, haulage, certification and replant options
- Mill door timber purchase
- Opportunity to utilise forestry services and transition existing plantations to a sharefarm arrangement at no cash cost
- Access to certified international wood chip and log markets
- Technology services - Wood property, pulp and paper analysis
- Forest management advice - Experienced localised staff available
- Land and Fire management services - Ecological and fuel reduction burning, wildfire management
- Seedling supply - Containerised *E. nitens*, *E. globulus*, *P. radiata* and assorted natives

Please feel free to contact Forico for a no obligation consultation.
